eMediTrack

EC Manager
for hospitals

Ideal For

Directors of:

* Quality
* Safety
* Security
* Accreditation
* Facilities or Plant Operations

"For a health system that has not implemented these solutions, I believe this program can be life changing. The value of having this information ready, available and tied together cannot be overstated."

*– Rich Ramirez, Director of Facilities at Parkview Regional Medical Center.*

Complete Solution

All eMediTrack solutions provide a 360 degree comprehensive approach to an issue. Our solutions take you from idea or deficiency through resolution and report the information back to you in intuitive real-time dashboards.

360°

Do You Know?

Clients using eMediTrack say they enjoy the simple and intuitive interface that allows them to quickly see the status of their environment in real-time. Dashboards and reports are easily configured to meet each users specific requirements.

EC Manager
for hospitals

Efficiency. eMediTrack makes collection of relevant data during environmental tours easier, and automatically notifies all responsible parties about deficiencies.

Accuracy. eMediTrack automatically sets due dates for action plans, notifies responsible parties and admins about approaching due dates, and ensures you can close the loop.

Analysis. Improved efficiency and automation means less time collecting data and more time putting it to use. That means better allocation of your valuable time and resources.

Functional Walkthrough

Summary

The EC Manager comprehensively tracks and automates every part of the environmental tours process, starting with automated scheduling for all patient care and non-patient care areas. The EC manager will send automated reminder notifications to all responsible parties about upcoming environmental tours.

Tours are then documented electronically using any off-the-shelf smartphone or tablet, allowing you and your multi-disciplinary team to photo document any found issues. You can create multiple categories and checklists, and modify the questions database at anytime. Once the tour is completed, all responsible parties will receive an email notification about identified deficiencies and corrective action deadlines. That means no spreadsheet dual entry and no manual emails. You can even automatically generate ILSMs from the tablet when required.

From there, responsible parties can document all corrective actions, making it easy and efficient to close the loop. In the event that deficiencies are not closed on time, automatic escalation notifications are sent for accountability purposes.

Outcomes

The EC manager doesn't stop at improving your tours and loop closing processes. The solution comes complete with comprehensive real-time reports and dashboards. No additional labor is required to create these reports or dashboards, as they utilize dynamic data coming from your multi-disciplinary team and responsible parties.

These dashboards give you and your team the ability to measure and evaluate performance by area, management plan, individual questions and even by joint commission standard and element performance.

This translates into more successful modifications to management plans and staff education tools, and ultimately improved performance. You can even create custom reports and dashboards that mirror the performance indicators being evaluated by committees and leadership.

⇒ Improve process efficiency and guarantee documentation and accreditation readiness.

⇒ Implement changes that result in fewer deficiencies, faster turnaround time and improved accountability across the organization.

⇒ Cut associated labor hours and costs in half.
